

Dear Respected Community Member,

Most of us have chosen to come to Australia to start a new life and enjoy the bounty that this country has to offer. Nonetheless, we all still miss our beloved motherland and yearn for its music, poetry and culture.

Satellite TV is a great enabler in bringing our country and culture to our living rooms. However, until now, this medium was the domain of the privileged few who were willing to put up a 3meter, C Band dish on their roof with more than \$2000 in installation/support cost and which is no longer permitted by most City councils in residential areas.

You will be happy to learn that **teleBANGLA**, a new Melbourne based Venture, has made this service accessible to all in Australia and New Zealand at a very nominal cost. The joy of watching Bangladeshi Satellite TV is now not just limited to a chosen few in our community.

The service is provided through the high sailing AsiaSat 4 Satellite which can be installed very easily in all types of dwellings including rental properties. The technology uses a 65 cm small dish, very similar to a Foxtel dish, instead of a 3 meter giant. The signal will be encrypted on KU band with a high resolution providing an uninterrupted audio visual service for your viewing pleasure.

The standard package is a monthly subscription of \$29.95(less than \$1.00 a day) with a once off installation fee with Dish and Receiver of \$350.00 plus GST. The Dish and Receiver will be the property of the subscriber and can be transferred easily from location to location.

The service is now available for subscription with Satellite Channel **RTV**, **Channel I** and **ATN Bangla**. The free to air service from Telstar 10 will gradually be terminated as more channels migrate across to AsiaSat 4's encrypted service.
