

JULIA GILLARD AND BANGLADESH

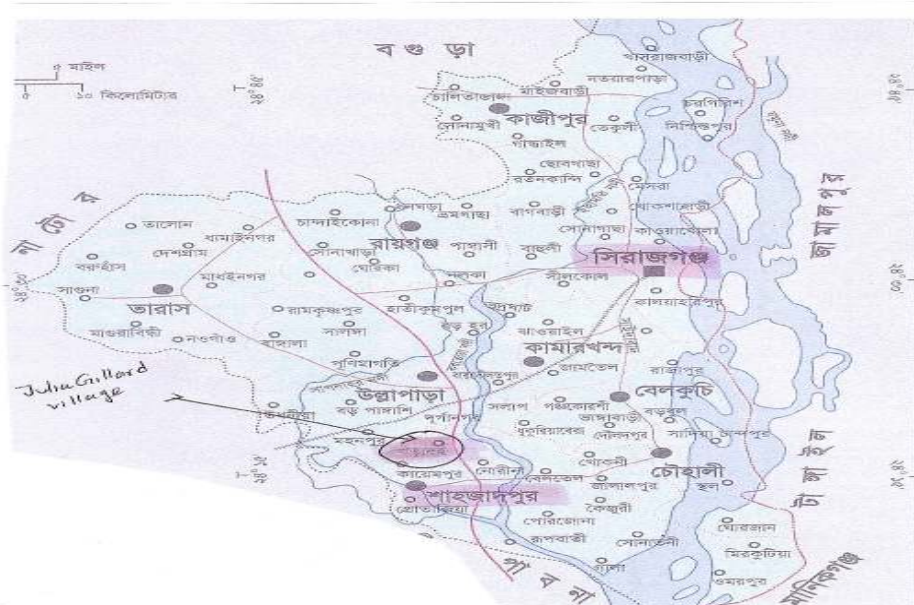

POPULATION RISING AND FUTURE OF BANGLADESH

One village, northern part of Bangladesh is urging its position against population rising and its effect on Bangladesh in near future. This part of Bangladesh like to take the action against population rising as Bangladesh is the victim of over population. Unlike rest of the population of the world who wants to save our beautiful planet from natural disaster, population of this part of Bangladesh are thriving for a change and responsible action to prevent future disaster caused by population problem. And in this present situation of the world one leader Julia Gillard –prime Minister of Australia has become an inspiration for this part of the population to do something about the consequences of over population and save our future generation.

"I support a population that our environment, our water, our soil, our roads and freeways, our busses, our trains and our services can sustain." Julia Gillard, Prime Minister of Australia.

Step taken by Australia as a developed nation on controlled population have inspired the people of this area to act according to Julia Gillard doctrine of "we don't want a big Australia" and to save the area of Bangladesh which is going to be the first victim of high populated Bangladesh. People of this area have shown their unity with Julia Gillard as she asks for unity of the world on population problem. People of **Charnabipur village** have decided to name their village as "Julia Gillard village" to show the respect of responsibility on population control. People of the "Julia Gillard village" have vowed to work on population control and her goodwill.

Location

Where: Northern part of Bangladesh and Bank of river Jamuna.

Population: 2693814

Literacy: 60%

Area: 2498 km

Background: It was 30th of June, 2010. Shafik rahman from Australia and Mr Ruhul and Mr chayan Islam (MP) of Bangladesh decided to honour Julia Gillard for the statement she made for a forward Australia. People of Bangladesh believe the statement is quite fit for the Bangladesh as we have surplus population but no solution. Connie Puglia from WA, a social worker came to help them to make a safer Bangladesh. Concetta (Connie) Puglia is a selected member of a foundation in Bangladesh where she is playing a vital role to help poor people to fight with poverty.

During election in Australia advisor of **Julia Gillard application committee** (JGAP) shafik rahman played a big role with that statement made by Julia Gillard in Bangladesh to create awareness.

2nd July, 2010 high official people of that area decided to declare an official honour the Julia Gillard and they planned a big program on 8th of November, 2010.

Through this effort we want to educate our people to move forward with our limited resource and population control using "Julia doctrine". We want to create effective awareness through cultural intervention. We believe Julia doctrine of population control can give a new look to Bangladesh which we are waiting for last forty years.

Shafik rahman
